

OBJECTIVE

Motivated Computer Science sophomore at Virginia Tech seeking software development or computer science internship to apply problem-solving skills in a dynamic environment that is invested in mentoring students to further advance post-degree careers.

ACADEMICS

Virginia Tech, Blacksburg, VA (2023-2024)

- GPA [3.1]
- College of Engineering
- Computer Science Major
- B.S. in Computer Science – Spring 2027

TECHNICAL SKILLS

Languages	Tools	Development Environments	Computer Aided Design
Java	Docker	Eclipse IDE	Fusion 360
C/C++	Linux	VisualStudio Code	Solidworks
HTML	Git	BlueJ IDE	
	ArcGIS Pro	Unity Game Engine	
	Azure		

PROJECTS

Social Media Manager (Spring 2024)

- Multi-level program that collected and compared social media influencers' data, such as likes, views, followers, and comments. The program featured dynamic graphs to display influencers' growth with options to view data on a monthly, yearly, or quarterly basis. Made over the course of a semester in Eclipse IDE using Java.

Containerized Web Portfolio (Spring 2025)

- Developed and deployed a responsive personal website showcasing academic background, technical projects, and contact information. The site was containerized using Docker and hosted on Microsoft Azure. Designed with clean navigation and interactive elements to ensure a user friendly experience across devices.

HCI MoodMeal App (Spring 2025)

- Designed a prototype web app that recommends meals based on user mood input using a matching algorithm. Focused on usability and personalization. Developed as part of a Human-Computer Interaction unit to explore emotional design in user interfaces.
